## Classroom Furniture & Storage Solutions for the Kinetic Learning Environment

*Today's students face a quickly changing, technology-saturated world, and schools have a daunting challenge to prepare them for it.*

While the three R's were considered a good education 50 years ago, 21st century students must become adept at working together, innovating, analyzing, and adapting to rapid developments.

This course *explores how a student-centered, kinetic classroom is an ideal setting to hone these skills and presents specific furniture and storage solutions that support the active, flexible learning environment crucial for today's students.*

### Learning Objectives

- Understand the benefits of student-centered education.
- Discuss how classroom design can support flexible, student-centered learning.
- Evaluate the options for individual classrooms based on furniture features and benefits.
- Specify classroom furniture and storage solutions to meeting school's needs and requirements.

The American Institute of Architects  
Course #707, expiring May 2026.
